

BHAUTIK VEKARIYA

Aspiring Data Scientist & ML Engineer

+91-9157069819 bhautikvekariya1123@gmail.com LinkedIn GitHub

Professional Summary

Data Scientist and Machine Learning Engineer specializing in end-to-end ML pipelines, deep learning models, and MLOps systems. Experienced in Python, TensorFlow, and scikit-learn with proven expertise in deploying scalable REST APIs and building predictive models that drive business value.

Skills

Programming: Python, SQL, NumPy, Pandas, scikit-learn, TensorFlow, Keras, PyTorch
Machine Learning: Regression, Classification, Clustering, XGBoost, Random Forest, SVM, Decision Trees
Deep Learning: CNN, RNN, LSTM, Transformers, Neural Networks, Transfer Learning, NLP
MLOps & Tools: MLflow, DVC, Docker, FastAPI, Git, GitHub Actions, CI/CD, REST API
Data Analysis: EDA, Feature Engineering, Statistics, Probability, Data Preprocessing, Time Series
Visualization: Matplotlib, Seaborn, Plotly, Tableau, Data Storytelling

Experience

Data Analytics Intern

Jun 2024 – Aug 2024

IBM SkillsBuild, CSRBOX Foundation

Remote

- Applied statistical hypothesis testing (t-tests, ANOVA) to validate the effectiveness of feature engineering, improving model accuracy by 15% and informing key business decisions
- Designed 5+ interactive dashboards using Power BI and Tableau with real-time filters and drill-down capabilities, presenting data-driven recommendations through visual storytelling

Data Science Mentorship Program (DSMP)

May 2025 – Jan 2026

CampusX

Remote

- Completed an intensive, project-based data science training spanning a 10-module curriculum covering Python, statistics, machine learning, deep learning, and MLOps fundamentals
- Built real-world case studies and projects applying EDA, feature engineering, and predictive modeling techniques, reinforcing practical skills through hands-on assignments and job-preparation modules

Projects

AQI Prediction MLOps Pipeline | XGBoost, FastAPI, Docker, MLflow, DVC

[Live API](#) | [GitHub](#)

- Built production-grade REST API for real-time Air Quality Index predictions across 29 Indian cities using XGBoost with 8 meteorological features, deployed on Hugging Face Spaces with automated CI/CD pipeline
- Optimized model architecture reducing memory footprint by 70% through feature selection and quantization, enabling deployment on free-tier cloud infrastructure without performance degradation
- Implemented parallel processing using ThreadPoolExecutor, reducing bulk API response time from 30s to under 3s for batch requests handling 29 cities simultaneously
- Established automated model validation processes within the MLOps pipeline, leveraging MLflow and DVC for experiment tracking and version control, ensuring consistent model performance with zero deployment failures over 4 months

AI Interview System | FastAPI, React, LLMs, Cassandra, Docker, Kubernetes

[GitHub](#)

- Built an end-to-end AI mock-interview platform with resume parsing (PDF/DOCX/TXT), LLM-powered role-aware question generation, and voice-enabled interview flows using TTS (ElevenLabs, gTTS) and ASR (Whisper, Deepgram) provider integrations
- Architected a 10-module FastAPI backend with Cassandra-backed session/history persistence, ChromaDB vector store for semantic resume retrieval, and multi-provider LLM routing (Claude, Mistral, Groq, Gemini, OpenRouter)
- Implemented production-grade MLOps pipeline for NER-based resume entity extraction using DVC + MLflow experiment tracking, with optional Rust-accelerated preprocessing hot paths for parser performance
- Deployed full microservices stack on Kubernetes (EKS) with CI/CD via GitHub Actions, Docker, Argo CD GitOps, Prometheus/Grafana observability, Jaeger distributed tracing, and Apache Kafka event streaming

Education

Adani Institute of Infrastructure Engineering, GTU

Sep 2021 – May 2025

Bachelor of Engineering in Information and Communication Technology — CGPA: 8.46/10

Ahmedabad, India

BAPS Swaminarayan Vidyamandir

Jun 2019 – May 2021

Higher Secondary Certificate (HSC), GSHEB — Percentage: 84.67%

Gondal, Gujarat
